

Global Warming Hoax Spells Genocide Adopt the LaRouche Plan for Development!

Copenhagen Dec. 7, 2009 -- As delegates from nearly 200 nations gather here in Copenhagen, no one can ignore the fact that the Climate Summit is taking place under a cloud of scandal. But what is the real content of that scandal? For some, it is the allegation of the theft of thousands of e-mails from the East Anglia University. And what about the fact that these e-mails further expose the fact that the data "proving" global warming is a hoax, and that the proposal to deal with it by spending trillions of dollars, will lead to increasing the death rate exponentially throughout the world? Is that not the real scandal?

And what about the fact that, more than a week after the East Anglia e-mails were revealed, most of the world's establishment media continue to ignore their content, and are still beating the drums for the Climate mafia? Does that not show that there is indeed a conspiracy afoot, a conspiracy to ram through measures that will enforce genocide on mankind?

We must face the ugly truth. The catastrophe that threatens mankind is not climate change, or carbon, or any one of a number of phony "environmental" issues; it is the breakdown of the world's imperial monetarist system, imperilling the lives of billions. The real threat is that those shaping this Climate Conference, starting with the British Monarchy itself, have an agenda of *reducing population* worldwide, by setting up a form of global governance to reduce consumption and production. This genocidal agenda must be rejected, in favor of the LaRouche Plan for reversing the economic crisis, which is on the table of major world governments right now.

A Genocidal Fraud

After almost 1,000 scientists have recently distanced themselves from the thesis of the Intergovernmental Panel on Climate Change (IPCC) concerning allegedly anthropogenic global warming, now the scandalous manipulations that hackers have unearthed in the e-mail communications of

"scientists" of the Climate Research Unit (CRU) of East Anglia University in Great Britain, are the final proof of the climate fraud – in case anyone still needed it.

In reality, the raw, unadulterated data from long-term weather stations show little or no change during the last 150 years. Half of the stations show a slight cooling, and global cooling has been occurring for around ten years. So what is behind this enormously expensive campaign?

The answer is clear: Apart from all sorts of profiteers, who see the CO₂ emissions trade as a new opportunity for ripping off the population, it is essentially the policy of the British Empire, or, more precisely, of Prince Philip, who has repeatedly said publicly that he wants to be reincarnated as a virus, so as to more effectively contribute to population reduction.

On Nov. 12, the CEO of Prince Philip's World Wide Fund for Nature (WWF) told reporters: "We believe it fundamental for the President to go to Copenhagen, to look other leaders in the eye, convey our commitment as a country, and secure theirs." And promptly Obama announced, contrary to earlier statements, that he would be in Copenhagen on Dec. 9. When the WWF, on Nov. 24, said Obama should return to Copenhagen later in the process, to help ram the treaty through, he quickly announced a change in plans--and now will be there with other heads of state on Nov. 18.

Moreover, it is monstrous that an official UN organization, the UN Framework Convention on Climate Change, and the Danish government, want to place the question of population reduction officially on the agenda.

According to the Danish newspaper *Berlingske Tidende*, Danish Development Minister Ulla Tørnæs has admitted the controversial character of this proposal, which in several nations is still considered a huge taboo. But since, she says, there's a connection between population growth and climate change, this proposal also has the complete support

of the Danish Prime Minister.

The British organization Optimum Population Trust (OPT), which crusades for global population reduction, asserts in a study that one of the best opportunities for combatting so-called "global warming," consists in preventing births, because preventing the birth of new "polluters" would be a far cheaper means to prevent "climate catastrophe," than acquiring renewable energy sources. According to the study, by spending £200 trillion, we could prevent a half-billion births, and thus the emission of 24 billion tons of CO₂, over the next 40 years.

Also revealing, according to {Forbes} magazine, is that the "14 richest men in the world" (who owe their wealth not least to the casino economy) met back on May 5 of this year at the home of the president of the private Rockefeller University. Bill Gates, Warren Buffett, Michael Bloomberg, George Soros, Peter Petersen, David Rockefeller, Jr., and the other participants in this illustrious gathering agreed that the problem of population growth poses the worst environmental, social, and industrial threat.

Another in a whole series of conferences, which served to prepare for the Copenhagen summit, was the conference of the Policy Network think-tank on June 5 at the London School of Economics, at which Tony Blair, whose authorship of the Iraq War is right now under investigation in Great Britain, delivered the keynote speech, emphasizing that a "revolutionary change in behavior" is required. To this end, the United States alone would have to reduce its emissions to one-tenth of the current level! Blair left no doubt that he sees the greatest problem in the fact that China wants to implement "the greatest industrialization that the world has ever seen."

Planning a New Fascism

During a three-day conference in Essen, Germany on the theme "The Great Transformation," organized by the Mercator Foundation in collaboration with the Climate Institute in Potsdam and Wuppertal, a prospectus for its Working Group 4 stated: "Could open democratic societies keep up with the impact of serious changes in the global climate, or could authoritarian regimes be better suited to enforce the measures required?" One of the participants in this conference was the head of the Climate Institute in Potsdam, Hans-Joachim Schellenhuber, a recent host of Prince Charles for

an "Experts' Discussion on the Environment and Climate Themes" at the Potsdam institute, and who has also been awarded the highest English order, the Order of the Garter.

One can only agree with Lord Christopher Monckton in his characterization of the climate fraud and the Copenhagen conference: It is the attempt to establish an unelected world government with enormous and unprecedented powers. A small, closely linked grouping of so-called scientists is now exposed as frauds and criminals. Another grouping under the leadership of former British Finance Minister Lord Nigel Lawson, along with a substantial group of other Lords, authors, and journalists, has just now established a new website, and a Global Warming Policy Foundation (GWPF), which has dedicated itself to the fight against this fraud.

Unfortunately, there can be no doubt that there is a consensus in the pro-British part of the international establishment, to respond to the systemic crisis of the global financial system with a new fascism, in which the poor, the weak, and the sick are to be sacrificed for the benefit of speculative interests.

To aim for such a policy falls under the Nuremberg Laws after World War II.

The LaRouche Plan

The LaRouche Plan alternative to economic breakdown, and genocide, has been put on the table, far and wide, for several decades. It calls for setting aside the trillions in unpayable, fraudulent debt, and establishing a new cooperation between sovereign nation states, for a fixed-exchange rate system, and collaboration on a new set of international infrastructure development projects. Only sovereign states should control credit, LaRouche argues, and the group of nations which can make that policy stick is the Four Powers--the U.S., Russia, China, and India.

Over recent weeks, significant steps toward such an agreement have been taken by Russia and China, greatly upsetting the British financial establishment. The time is now ripe for the next steps to be taken. While the power lies with these four powerful nations, all nations are vitally interested in the resumption of rapid technological progress, such as the building of high speed rail corridors, nuclear power plants, and vitally needed water projects.

So, put the genocide agenda in the wastebasket, where it belongs. The future lies with the LaRouche Plan.
